American International University- Bangladesh (AIUB)

Faculty of Science and Technology (FST)

Department of Computer Science (CS)

Faculty Name:	Zinniya Taffannum Pritee
Faculty ID:	2502-2514-2
Course Code and Title:	CSC 3113 Theory of Computation
Semester:	Summer 2025-2026
Section:	V

(A) CO Statement

COs	CO Description	Mapped POs	Assessment Method	Assessment Rubric
CO1	Demonstrate different computational model and mathematical notations	PO-a-2	Final Term Exam	Rubric for Term exam
CO2	Use original example of different computational model and mathematical notations	PO-a-2	Midterm Exam	Rubric for Term exam
CO3	Illustrate a solution for a complex problem using the principles of existing computational models	PO-c-3	Quiz	Rubric for Quiz
CO4	Explain the principles of existing computational model and use it to find a new solution.	PO-l-2	Midterm Exam	Rubric for Term exam

(B) CO Evaluation

Theory of Computation [V]			CO1 (5) Final Term Exam	CO2 (15) Midterm Exam	CO3 (15) Quiz	CO4 (15) Midterm Exam
Sl	Student ID	Name	CO1 (5)	CO2 (15)	CO3 (15)	CO4 (15)

Faculty Name:	Zinniya Taffannum Pritee
Faculty ID:	2502-2514-2
Course Code and Title:	CSC 3113 Theory of Computation
Semester:	Summer 2025-2026
Section:	V

Enrolled Students:

Bachelor of Science in Computer Science / Engineering	42
Total	42

CQI (Section wise Review Report)

Total Students: 42				
	CO1	CO2	CO3	CO4
Number of students attaining a particular CO	26	28	25	36
Number of students not attaining a particular CO	16	14	17	6
Percentage of students attaining a particular CO	61.90%	66.67%	59.52%	85.71%

CO1: CO1 was evaluated through Final Term Exam. It has been observed that out of a total of 42 students, 26 students were able to attain 60% marks, i.e., 61.90% of students were able to attain CO1.

CO2: CO2 was evaluated through Midterm Exam. It has been observed that out of a total of 42 students, 28 students were able to attain 60% marks, i.e., 66.67% of students were able to attain CO2.

CO3: CO3 was evaluated through Quiz. It has been observed that out of a total of 42 students, 25 students were able to attain 60% marks, i.e., 59.52% of students were able to attain CO3.

CO4: CO4 was evaluated through Midterm Exam. It has been observed that out of a total of 42 students, 36 students were able to attain 60% marks, i.e., 85.71% of students were able to attain CO4.

The following chart represents all CO attainments together. Chart for CO attainment summary of Theory part of this course:

CO ATTAINMENT SUMMARY-SEC-V

- Number of students attaining a particular CO
- Number of students not attaining a particular CO

PO Attainment Summary

PO	Mapped CO	Assessed	Attained	Not Attained	% Attained	Class Target	Status
PO-a-2	CO1 (**)	42	26	16	61.90%	60%	Met
PO-c-3	CO3 (**)	42	25	17	59.52%	60%	Not Met
PO-l-2	CO4 (**)	42	36	6	85.71%	60%	Met

(**) Each PO takes the attainment of its dominant CO, per the CO-PO map: PO-a-2 uses CO1; PO-c-3 uses CO3; PO-l-2 uses CO4.

2) Areas for improvement

Some areas were identified for further improvement based on faculty and student feedback for the course. These are mentioned as follows:

- a. Course content (Refinement of Course Outcomes for clarity, better measurability, and reduced overlap).
- b. Alignment and expansion of CO-PO mapping.
- c. Assessment strategy (incorporating continuous methods to measure higher-order thinking).
- d. Assessment tools (utilizing digital platforms to reduce administrative workload).
- e. Motivation towards CO attainment.

3) Action plan

- a. Revise overlapping Course Outcomes (e.g., CO1 and CO2) using action verbs aligned with Bloom's Taxonomy, and separate explanation from problem-solving.
- b. Expand mapping to strongly reflect problem analysis (PO-c-2) and design/development of solutions (PO-e-2) due to the theoretical logic required.
- c. Provide more diverse examples for problems and include brief in-class exercises during lectures for better practical understanding.
- d. One short talk/lecture related to the significance of the OBE curriculum and CLO and PLO mapping can be organised for better understanding by the students.
- e. Explaining each and every CO and all assessment tools properly at the very beginning of the semester.
- f. Utilize digital tools or learning management systems to streamline tracking of CO-PO attainment and enhance efficiency.
